Third Annual Conference & Exhibition

ASSESSMENT TOMORROW EDINBURGH - 2008

12th November 2008 at the Grosvenor Hilton Hotel, Edinburgh

21st Century Techniques and Technologies to Measure Skills and Knowledge

SQA has stated publicly that e-Assessment will play an increasingly important role in supporting delivery of their qualifications and that e-assessment offers significant benefits to SQA, centres and, in particular, the candidates that take those qualifications.

Whether you are involved in formative assessment in the classroom, or the delivery of high stakes qualifications in education or the workplace, you will not want to miss this important event.

Following on the success of the first two conferences, and again working in collaboration with SQA, the conference will examine the practical aspects of implementing e-Assessment, including Computer Based Testing and e-Portfolios, in education, training and professional development.

Managed by Assessment Tomorrow Ltd., the conference boasts an impressive line-up of authoritative speakers and includes a key note address from SQA.

See how e-Assessment offers exciting and innovative approaches to otherwise costly or inflexible assessment of learners or employees.
